

If you have playdough at home, your child could make the correct number of eggs to add to each nest to make 10 altogether. Alternatively, they could draw and cut out eggs and select the correct amount each time. Then, support your child to write a number sentence for each nest. For example, the first one would be $5 + 5 = 10$. Please refer to your child's orange number book to help them with the correct number formation.

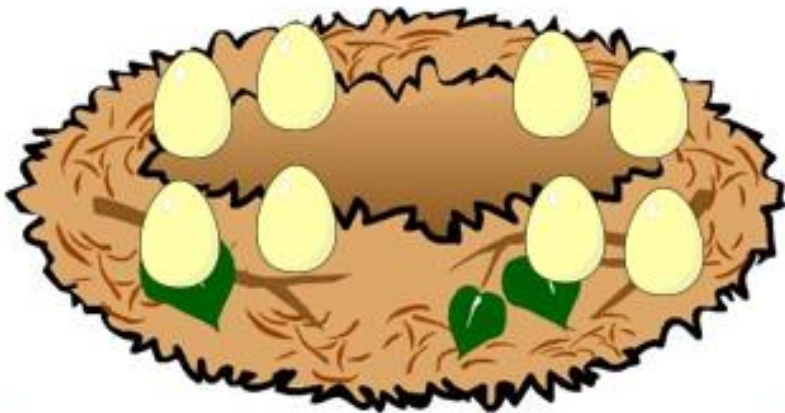

Make **10 eggs** on the nest altogether.

Make **10 eggs** on the nest altogether.

Make **10 eggs** on the nest altogether.

Make **10 eggs** on the nest altogether.

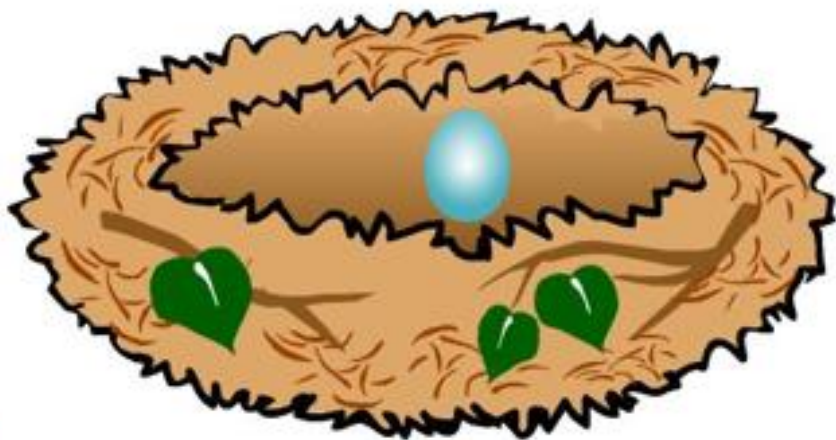

Make **10 eggs** on the nest altogether.

Make **10 eggs** on the nest altogether.

Make **10 eggs** on the nest altogether.

Make **10 eggs** on the nest altogether.
