

Impact Review of Sports Premium for 2018 / 19

Key indicator 1: The engagement of all pupils in regular physical activity – Chief Medical Officer guidelines recommend that primary school children undertake at least 30 minutes of physical activity a day in school

The school completed the installation of an all season running track and outdoor gym equipment. This has meant that at break and at lunchtimes we have children regularly undertaking in physical activity.

In addition, class teachers use the track for break out time and to avoid fatigue within lessons. These breaks not only support physical activity, but have also had a good impact on children's well-being and also on supporting their engagement with teaching more widely.

Sports coaching at lunchtimes was accessed by around 340 children throughout the year. This focussed on a variety of different sports across the year. Feedback from pupils indicates that they enjoy these sessions and that they help them to undertake sports activity.

The WOW initiative was undertaken and this supported motivating children to walk or cycle to school. This was well received by children and many were keen to gain badges for adopting healthier arrangements for getting to school.

Key indicator 2: The profile of PE and sport being raised across the school as a tool for whole school improvement

The new track was greeted with excitement and gave physical activity a positive boost, with everyone wanting to use it. We promoted sport through feedback at celebration worship about how children had performed at tournaments.

We continued to run a great many after school activity clubs which supported the raising of sport across the school.

A new co-ordinator was appointed and she has undertaken her role with enthusiasm and introducing initiatives to capture children's enthusiasm for sport.

Key indicator 3: Increased confidence, knowledge and skills of all staff in teaching PE and sport

Staff CPD was undertaken across both Key Stages and through a variety of areas of sport. CPD was well received with positive reports of engagement from the provider. Staff feedback was positive and felt that it had improved their knowledge and expertise.

Key indicator 4: Broader experience of a range of sports and activities offered to all pupils

Our clubs offer were very popular and across the year around 230 children took part in various sports clubs ranging from football to boccia. Pupil feedback was very positive with many children taking part in multiple sporting opportunities.

We liaised with a number of local sports clubs – rugby, cricket, football, hockey and tennis. We also promoted other sporting opportunities in the locality through regular newsletters.

Key indicator 5: Increased participation in competitive sport

The school appointed a co-ordinator for P.E. and Games and she has enthusiastically undertaken the role. A number of intra sports competitions have been undertaken and various projects to promote the use of our sports track.

Around 25 sports competitions were entered with a variety of children from across Years 3 to 6 taking part. More children took part in competitive sports – both inter and intra tournaments across the year. Some children who attend sports clubs tend to dominate some of those teams and this area will be developed over the next sports premium cycle.
