Owls build their homes in trees.

Look at this information about animals and their habitats. Choose an animal and try to find extra information about where it lives. Then use the information to complete the sheet below.

Animal Habitats

A habitat is a natural environment that an animal lives in. A habitat provides animals with 3 important things:

- food;
- shelter;
- a safe place to raise their young.

Name _____

Date _____

L/O I know that different animals need different habitats to survive.
